

App: For students

User Login App using their RUID and also find their current request and destination request in the scroll bar interface. After that they can just simply click the "Click for bus" bottom in order to send request to our database.

Web: For transportation office managers

Since the purpose of web is to visualize data which is visualized and analyzed, managers will not have activities with data interaction and the only thing they need to do is to log in their account.

BackEnd:

Since it is server side codes and it will generate automatically, so user will not have to worry about.
