

Android App UI

IDE Used: Android Studio

Designated API: Version 27, Android 8.1 Oreo

Test Device: Google Pixel 2

This Android application is the Firebase connectivity portion of our project.

Our application is still a work in progress and has not been built into an APK with Gradle yet, therefore it will only run in an emulated environment.

Android App Firebase

IDE Used: Android Studio

Designated API: Version 27, Android 8.1 Oreo

Test Device: Google Pixel 2

This Android application is the framework for the UI and navigational component of our project that will later be combined with the Firebase implementation app.

Similar to above, it has not been built into an APK yet. The features of this app will be integrated into the UI app.
